**Subject:** Fwd: Region 8 Tribal Environmental Directors meeting

Hi George,  
Your inquiry got passed along to me after Dan, Joyce and I consulted. We can sure give a talk at your conference on water quality or related topics.  
Here are a couple of thoughts and a few questions:

1. We have not done any site specific work on the Dewey Burdock proposal uranium mine. We could discuss aquifers and groundwater flow directions since we studied the broad area as part of the Black Hills Hydrology Study.
2. We can give a talk about Unconventional Oil and Gas Development which basically means horizontal drilling and fracking. How it is done and what the real environmental concerns are.
3. Climate and streamflow trends for the Northern Great Plains.

Would these topics be of interest to you?

Thanks,  
Mark

Joyce, the Region 8 Tribal Environmental Directors meeting is going to be in Rapid City October 21, 22, and 23, 2014. Since our meeting was going to be in Rapid City and the South Dakota Water Science Center is in Rapid would you be interested in presenting to our group? Topics could be the Dewey Burdock uranium district water resources, oil and gas exploration, or just about anything you think would make a good topic for our group.

If you are interested and would like to run a couple of ideas by our group, please e-mail Richard Leasure and myself back. thanks
